FINE MATERIALS IN LINEAR AND THREE-DIMENSIONAL COMPOSITIONS

Gold is characterised by precise, linear coverings that are at the same time three-dimensional, with forms inspired by water, damask or an updated Baroque style and gilded frames that complement the three-dimensional surfaces with fine materials and the expertise of Gardenia Orchidea artisans.

**HIGH QUALITY MATERIALS AND LINEAR,
THREE-DIMENSIONAL COMPOSITIONS**

Gold is characterized by its precise and straightforward, but also three-dimensional wall tiles. The shapes inspired by the water create damask or baroque effects, and current-looking, gold-plated frames accentuate the 3D surfaces thanks to fine materials and the masterful craftsmanship from Gardenia Orchidea.
